EXECUTIVE DOOR PANELS

Quality Panels

Schöne

portes - doors
Quality Panels

Treat yourself to the best

Safety

The security of the door constitutes one of the most significant criteria about its selection. **Executive** panels are manufactured with aluminum sheet 3 mm thick on the outside and 2 mm on the inside. They are made of four-layered or three-layered glass panes and triples 4+4 mm on both sides while there is always the option of a steel sheet in the interior of the panel.

Design

Executive panels are distinguished for their high aesthetics and characterized by their linear and at the same time modern design. They are available in a great variety so much in design and colour as in accessories and glass panes while most of our models are simply...Exclusive! The combination of the built-in inox, the glass pane and the engraved lines lend a modern touch to the entrance of your house.

Certified Quality

Executive panels are certified by the international standards ensuring quality ISO 9001 and come with certification of thermal insulation by the Institute of Rosenheim. The quality materials we use as well as the strict technical specifications we have designated for the manufacture of panel Thiral ensure their perfect quality.

Thermal insulation

Executive panels offer high thermal insulation level certified by the Institute of Rosenheim. The overall thickness of the panel in combination with the good quality of the extruded polystyrene and the three-or-four-layered energy-efficient glass panes reduce the thermal insulation factor up to $U_p=0.35 \text{ W/(m}^2\text{K)}$.

Quality Panels

Enjoy the moments with your loved ones

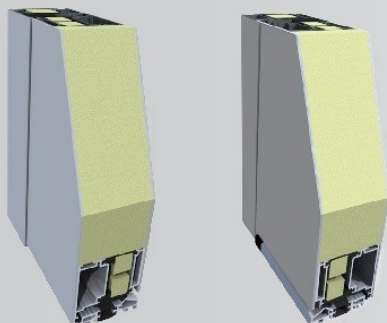

and leave the entrance to your house to us

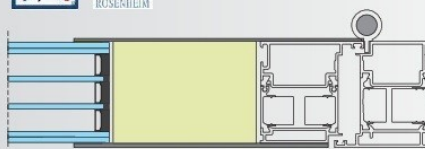

With our long experience, expert knowledge and advanced technological equipment we have created the new type panels which provide perfect quality manufacture and models out of the ordinary. Designed with simplicity and cutting-edge architecture with a focus on minimalism they are characterized by the highly aesthetic and impressive appearance. Simultaneously, they provide security with four-or-three-triplex glass panes in combination with the exterior 3 mm thick aluminum surface. Needless to say, the sound insulation is more than satisfactory. A dominant characteristic of the **Executive** series is the energy saving which is provided due to the extraordinary thermal insulation factor of panel and the panes.

Only the best for you...

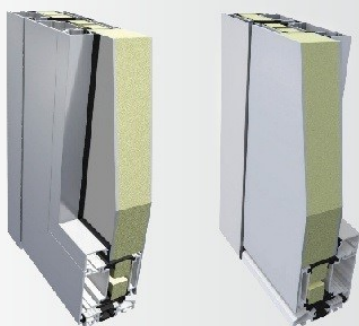

Type C

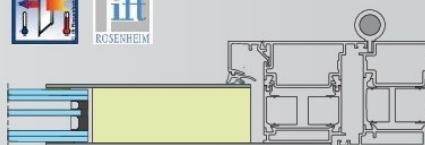

- Maximum thermal insulation level and high aesthetics
- Flat surface inside and out
- Four-layered glass panes for efficient thermal insulation
- Triples glass panes 4+4 mm satinato inside and out
- Aluminum sheet: 3 mm outside, 2 mm inside
- Thermal insulation factor for panel:
92,5 mm thick $U_p=0.35 \text{ W/(m}^2\text{K)}$
77,5 mm thick $U_p=0.42 \text{ W/(m}^2\text{K)}$

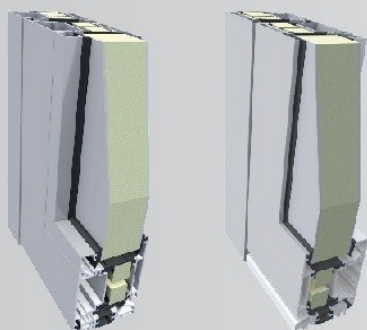

Type B

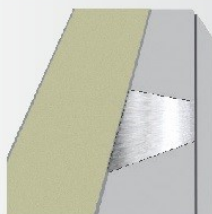

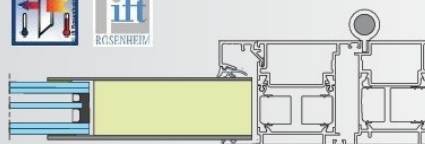

- Flat surface only out
- Three-layered glass panes for efficient thermal insulation
- Triples glass panes 4+4 mm satinato inside and out
- Aluminum sheet: 3 mm outside, 2 mm inside
- Thermal insulation factor for pane:
44 mm thick $U_p=0.72 \text{ W/(m}^2\text{K)}$
59 mm thick $U_p=0.54 \text{ W/(m}^2\text{K)}$

Type A

- Three-layered glass panes for efficient thermal insulation
- Triples glass panes 4+4 mm satinato inside and out
- Aluminum sheet: 3 mm outside, 2 mm inside
- Thermal insulation factor for panel:
44 mm thick $U_p=0.72 \text{ W/(m}^2\text{K)}$
59 mm thick $U_p=0.54 \text{ W/(m}^2\text{K)}$

Inox decoration placement patterns

The aluminum sheet is milled and the inox is places so that it is at a same level as the panel.

The inox decoration patterns are only on the external side of the panel.
